FUENTE: Elaboración Fundación Jubileo, con base en datos del INE correspondiente al Censo 2012 y las proyecciones de población para 2022. Y con datos del Presupuesto General del Estado 2022.

* La coparticipación tributaria para municipios y Gobiernos Autónomos Indígena Originario Campesinos (GAOIC) corresponde a lo establecido en la disposición transitoria tercera de la Ley Marco de Autonomías. Representa el 20% de las recaudaciones nacionales de los principales impuestos, como el Impuesto al Valor Agregado, el Impuesto a los Consumos Específicos, el Impuesto a las Transacciones y otros.

* La actual coparticipación tributaria fue calculada con base en el monto total que transfiere el TGN y el factor de distribución, por lo que, por los decimales del factor, en algún municipio podría variar en 1 o 2 bolivianos.

* No se han descontado los aportes para la Renta Dignidad ni el Fondo de Educación Cívica, en el presupuesto municipal.

* Se han sumado los datos del presupuesto y coparticipación de los municipios de Colquechaca y San Pedro de Macha del departamento de Potosí; y de los municipios de Mizque y GAOIC Rapaizampa del departamento de Cochabamba, para analizar con relación a la población, puesto que no se tienen datos de población por separado en estos municipios (y GAOIC) que se han dividido en los últimos años.
